Emerging terms: 2024–2025 vs 2021–2022
large language models 12.1
chatgpt 11.3
male 11.2
female 10.9
generative artificial intelligence 9.6
adult 9.6
middle aged 9.3
surveys and questionnaires 8.3
language 8.3
large language model 7.1
aged 5.5
medical education 5.5
ai 5.4
attitude of health personnel 5.4
comprehension 5.2
chatbot 5.1
cross-sectional studies 5.1
patient education as topic 5.1
natural language processing 5.0
educational measurement 5.0
clinical competence 4.8
internet 4.7
patient education 4.6
young adult 4.3
generative ai 4.3
llm 3.9
chatbots 3.7
qualitative research 3.7
health literacy 3.7
practice guidelines as topic 3.5
morals -5.5
neural network -5.5
diabetes mellitus -5.5
colonic polyps -5.6
tomography, x-ray computed -5.6
diagnostic imaging -5.7
prognosis -5.8
technology -6.0
diagnosis, computer-assisted -6.1
diabetic retinopathy -6.1
lung -6.2
humans -6.5
image processing, computer-assisted -6.5
endoscopy -6.6
computers -6.7
convolutional neural network -7.6
big data -7.8
radiologists -8.0
health facilities -8.1
pandemics -8.3
forecasting -8.4
retrospective studies -8.5
radiography -8.8
sars-cov-2 -8.8
delivery of health care -12.5
neural networks, computer -12.6
algorithms -14.0
covid-19 -15.0
deep learning -16.5
machine learning -17.8
−20 −15 −10 −5 0 5 10 15 20
z-score (weighted log-odds, informative Dirichlet prior)

Terms separating stance: critical vs favourable
delivery of health care 16.2
ethics 14.1
bias 12.8
qualitative research 9.2
health facilities 8.7
trust 8.4
mental health 8.1
informed consent 8.0
chatgpt 7.6
privacy 7.4
health equity 6.9
health personnel 6.6
decision making 6.6
mental disorders 6.5
confidentiality 6.4
healthcare 6.0
chatbot 6.0
united states 5.9
checklist 5.9
bioethics 5.9
regulation 5.7
healthcare disparities 5.6
morals 5.6
medical ethics 5.6
chatbots 5.5
computer security 5.5
health care 5.4
implementation 5.4
patient safety 5.3
ai 5.3
diabetic retinopathy -3.6
coronary artery disease -3.6
electrocardiography -3.7
mass screening -3.7
feasibility studies -3.8
coronary angiography -3.8
computed tomography angiography -3.8
screening -3.9
prognosis -4.0
meta-analysis -4.0
convolutional neural networks -4.2
prostatic neoplasms -4.2
magnetic resonance imaging -4.3
endoscopy -4.3
prospective studies -4.4
biomarkers -4.4
drug discovery -4.7
radiographic image interpretation, computer-assisted -4.8
forecasting -4.9
machine learning -5.1
radiomics -5.1
aged -5.1
convolutional neural network -5.2
neural networks, computer -5.3
predictive value of tests -5.5
tomography, x-ray computed -6.3
precision medicine -6.7
sensitivity and specificity -7.6
retrospective studies -7.9
deep learning -17.0
−20 −15 −10 −5 0 5 10 15 20
z-score (weighted log-odds, informative Dirichlet prior)
