2024-2025 vs 2021-2022 records
more in 2024-2025
large language models 12.1
chatgpt 11.3
male 11.2
female 10.9
generative artificial intelligence 9.6
adult 9.6
middle aged 9.3
surveys and questionnaires 8.3
language 8.3
large language model 7.1
aged 5.5
medical education 5.5
ai 5.4
attitude of health personnel 5.4
comprehension 5.2
convolutional neural network -7.6
big data -7.8
radiologists -8.0
health facilities -8.1
pandemics -8.3
forecasting -8.4
retrospective studies -8.5
radiography -8.8
sars-cov-2 -8.8
delivery of health care -12.5
neural networks, computer -12.6
algorithms -14.0
covid-19 -15.0
deep learning -16.5
machine learning -17.8
